RE: Docket No 98N-1038, Irradiation in the
Production, Processing and Handling of Food

We support the current requirement of the FDA that
the irradiation labels be truthful and not
misleading and that they be prominently displayed
on any food stuff so treated.

We agree with the recommendation by the Center for
Science in the Public Interest regarding labeling
of irradiated foods: "any foods, or any foods
containing ingredients that have been treated by
irradiation, should be labeled with a written
statement on the principal display panel indicating
such treatment. The statement should be easy to
read and placed in close proximity to the name of
the food and accompanied by the international
symbol. If the food is unpackaged, this
information should be clearly displayed on a poster
in plain view and adjacent to where the product is
displayed for sale."

Please retain the symbol so as to make sure it is
clearly understandable at the point of purchase for
every one. We treat so many patients with
illnesses that are a direct result of the life
style they lead and we feel the improvement of
health of the American citizen involves consumption
of high nutrient value foods that are fresh and
uncontaminated.

Sincerely,
Dr. Conrad G. Maulfair
Dr. and Mrs. Conrad G. Maulfair
